

Environmental Stewardship Award

The Pacific Coast Congress of
Harbormasters and Port Managers, Inc.

Wishes to Honor

Port of Juneau

Carl Uchytel

The City and Borough of Juneau has made a commitment to improve all aspects of the marine environment. The Port has shown their dedication to improving water quality and pollution prevention services for their customers by updating a variety of systems and best management practices throughout their extensive facilities. With their team cohesively working together, they have been able to develop a detailed implementation plan moving forward to continue the reduction of nonpoint source pollution and protect all areas of the marine environment while providing boaters with a safe, proactive facility for all users. It's great to have more Alaskan Harbors recognize the importance of protecting the marine environment.

Congratulations on your well-deserved recognition

Mike Loy, President
