Greetings, Juneau assembly members, and members of the Visitor Industry Task Force --

Juneau should allocate marine passenger fee funds toward the process of electrifying more of the docks. (At this point, only the Princess dock allows a cruise ship to hook up to shore — read clean, hydro-electric -- power.)

Not only would reducing cruise ship carbon emissions be consistent with Juneau's Renewable Energy Strategy and improve our own air quality, but it would also contribute to efforts being made throughout the world to address climate change overall.

Thank you.

Larri Spengler
