Dear City Clerk and Task Force,

I am a 45 year resident of Juneau. I am a retired teacher and live all year in Juneau. My concern with additional numbers of tourists being added to the upcoming season is the increase in volume of waste. How are we addressing areawide waste disposal?

Juneau has a growing hill of waste. What are the future plans for our community dump? We take a lot of waste from the cruise ships into our landfill. Visitors do generate waste. More visitors, more waste.

I would like a comprehensive plan to be developed for the future of our waste disposal area. Residents and visitors contribute to the growing mound of trash. It is the time to address this issue.

Respectfully,

Vicky McLaughlin
