RE: Impact of Tourism on BRH

Last month the Finance Committee posed the question of ‘How much is BRH impacted by tourism?’ We made an attempt to extract patient data from Meditech to identify patient activity related to tourism. We were able to identify both international and out-of-state patients. While this criteria may not be perfect it should be reasonably close. The attached spreadsheet shows the results.

The observations we were able to make are as follows:

- BRH treated 1,665 patients from out-of-state and international locations.
- These patients generated \$10,344,000 of revenue or 6% of BRH’s Total Revenue.
- Reimbursement for international paid claims is at 90% of charges. If it is assumed the balance of the international claims produced no additional payment the discount percent would be 25%. BRH’s total discount percent is 45%. The reimbursement on these claims is very favorable.
- The greatest volume impact was for the Emergency Department which treated 997 patients in FY2019.
- 119 inpatients were treated generating \$4.9 million of revenue.
- Tourism revenue increase 11% from FY2018 to FY2019.
- 83% of revenue generated from tourism occurred during the cruise ship season.
- BRH saw patients from all 50 states.
