Subject

Visitor Industry Task Force

Message

I'm against any proposal that would limit the number of tourists or the number of cruise ships visiting Juneau. Tourism is our leading growth industry and without the revenue it generates, CBJ would not be able to afford the services our citizens require. If there are problems with the number of tourists, the industry and CBJ should collaborate to reduce the impact. A good example is the new Norwegian dock which will alleviate bus traffic in the downtown corridor while providing their passengers with a longer stay in Juneau which will in turn lead to more revenue.
