Dear ESTF,

I'm happy for the SustainArts Juneau proposal that I submitted to be included in the ArtWorks proposal that Nancy DeCherney discussed yesterday.

We can include a specific call for artworks that address the Assembly's 2020 Sustainability Goals within the call for proposals/applications. The Juneau Commission on Sustainability is available to help frame the call and work with artists to create projects that engage Juneau residents in the long-term environmental sustainability and resiliency of our community.

I believe that the Assembly, too, will be happy for local artists to help the Assembly communicate and accomplish their articulated sustainability goals.

With the scope of the project expanded to include other artworks related to connecting our community, I believe setting aside \$500,000 will achieve a notable impact. This money will help to assure the economic survival of our arts community now and unite Juneau behind sustainability measures that are essential for our future.

Sincerely,
Anjuli Grantham
